Technical Information
03/2019 Schuhböcks Hybrid Flex

Description
A special product from the Schuhböck’s Hybrid Flex for ceramics, quarry tiles and porcelain. Schuhböck’s Hybrid Flex is a highly active cleaning concentrate based on a special composition of acids and supporting agents. The product is nearly odourless and does not develop any vapours.

Properties
Schuhböck’s Hybrid Flex dissolves anorganic deposits such as cement and mortar residues, residues of flexible grouting materials, efflorescence, rust and calcium deposits. The residues can then be completely removed from the surface.

Technical Data:
Density: 1.1 g/cm.²
pH-Value: <1 (concentrate)
Appearance: clear,
Odour: neutral
Solubility in Water: very good

Field of Use
Due to its mild odour, Schuhböck’s Hybrid Flex is particularly suitable for indoor use. For cleaning all ceramic surfaces, which need to be cleaned after laying and grouting. The original appearance of the surface is restored.

Surfaces: suitable for all acid resistant ceramic wall and floor tiles, quarry tiles, porcelain, clay and brick as well as terracotta surfaces.

Directions for Use
Dilute Schuhböck’s Hybrid Flex approx. 1:1 or 1:10 with water depending on the stubbornness of the deposits. Apply the solution to the wet surface and spread with a mop, white pad or scrubbing brush. Redistribute several times. After 5-10 minutes, brush the surface and rinse the solution with a sponge or a wet and dry vac. Rinse well with clear water. In case of cement based grouting materials, the dilution rate can be adjusted to 1:15.

Please Note: always test the product in an inconspicuous area prior to use. Acid sensitive surface such as enamel, zinc, marble, limestone, certain decorative tiles, wood, etc. must be protected against splashes.

Coverage: approx. 5 to 20 sqm. depending on the type and degree of contamination.

Storage
Keep closed and cool.
Shelf life of up to 2 years.

Environmental Protection
The contained surfactants are biologically degradable according to EU-regulations.
Disposal: diluted product may be added to waste water. Containers are made of environmentally friendly polyethylene (PE). Clean containers can be recycled through collection system.

Safety
Ingredients: acids, <5% non-ionic surfactants,
Labelling according to EU-Directive 1272/2008(CLP):
GHS Symbol 05, Danger.
May be corrosive to metals. Causes severe skin burns and eye damage. Keep out of reach of children. Keep only in original container. Wear protective gloves/protective clothing/eye protection/face protection. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/physician. Store locked up.

ADR 2013: 1-litre bottles - 10 per box
UN1760, LQ (limited quantity)

Please Note: statements concerning environmental and safety issues refer to the product as delivered (concentrated). This information should be considered to be informal and non-binding. The products must be used according to local conditions and materials. Always test the product in an inconspicuous area.
